

On Multipliers of $L^p(G, A)$

Serap Öztop
İstanbul University

Let G be a locally compact abelian group $1 < p < \infty$, and A be a commutative Banach algebra. In this talk, we study the space of multipliers on $L^p(G, A)$ and characterize it as the space of multipliers of certain Banach algebra. This method is applied to obtain the multipliers space on $L^1(G, A) \cap L^p(G, A)$.
